

## **INTERMEDIATE PHOTOGRAPHY WORKSHOP**

Day1 – You don't TAKE an image.....you MAKE an image.

Brief Camera Review : Aperature, Shutter speed, ISO, etc

- **The Elements and Principals of Visual Design**

What are the building blocks of an image.

12 Elements of a Merit Print

Advanced composition: How to use the Elements of Visual Design effectively

- **Using Exposure and Lenses**

Use of different lenses, perspective and exposure manipulation to achieve the look you want.

- **Using Off-camera Flash and light modifiers**

Flashes, triggers, reflectors, diffusers and DIY

- **Field Trip!**

Put your new photography knowledge to use - time to PLAY!

Day 2 - Taking your images from RAW (or jpeg) to AWESOME!

- **Project Presentation/ Matting, Framing & Titles**

Image review – what worked and what didn't

Presentation: digital and traditional matting, brainstorm titles, creative cropping (this can make or break a final image) for your images

- **Advanced Lighting and Exposure Techniques**

Challenging lighting or exposure situations? Learn how to deal with them.

- **Tech talk:**

Discussion of camera gear, file storage, categorization and archiving.

- **Adobe Photoshop & Lightroom – our “Darkroom”**

Overview of both softwares
